

**Gastric Pacer Check Price Quote**

***About Gastric Pacer Checks***

A gastric pacer is an implanted neurostimulator pulse generator system that delivers electrical impulses to nerves in the stomach to contract muscles and help control the symptoms associated with gastroparesis. In this procedure, the provider checks the programming system to ensure correct functioning of the neurostimulator. The provider tests functions like rate, pulse amplitude and duration, configuration of wave form, battery status, electrode selectability, output modulation, cycling, impedance, and patient measurements.

***Billing***

A gastric pacer check can be performed with or without reprogramming of the settings. Listed below are the specific billing codes and fee. The actual allowed amount (the amount of the billed charge deemed payable by an insurance plan) for each charge and the amount of your out-of-pocket expenses will depend on your particular insurance plan. It is important to check your individual policy and direct any questions to your insurer to determine coverage and your financial responsibility prior to receiving treatment.

<b>Billing Code (CPT Code)</b>	<b>Charge Amount</b>
95981 (without reprogramming)	\$149.00
95982 (with reprogramming)	\$226.00
